NB. These Caps and Bases are not designed to "clip" onto or around an existing shaft.

All either position above/below the shaft at time of casting or require a 55mm recess to be cast or cut into the shaft for subsequent installation of the Cap/Base.

If you do not have a recess for the Cap/Base then the next bigger Cap/Base could be used but it is likely to look too big.

If you require the Cap/Base to fit around the shaft then please discuss your requirement with our sales staff before ordering.
